Designing a great kitchen is a complicated task with many things to take into consideration. Storage is often overlooked, but the inside of your cabinets is as important as your door and drawer fronts.

We know how important it is to have plenty of practical storage space in your kitchen, keeping your working areas clutter free. Our clever storage systems will provide the perfect home for your foodstuffs, pots and pans and all those items you need to keep close to hand.

**BEAUTIFUL
ON THE
INSIDE**

TOP TIPS FOR THE PERFECT FLOW

The kitchen triangle

The primary tasks in your kitchen are carried out between the hob, the sink and the fridge. The triangle that connects these three areas defines what kitchen experts call an 'efficient kitchen layout'. The triangle is the shortest, most effective way to tread between these three areas and should be considered in your new kitchen design.

Group similar functions

Consider grouping the functions of your kitchen and planning your storage accordingly. There's no point in placing a spice rack yards away from the hob. Specialist trays and inserts for our range of base units help you create highly-functional storage zones.

The perfect serve

Try to imagine where you're most likely to serve up your meals. This is a great place to store your cutlery, plates and bowls. Take advantage of our wide range of drawer inserts to make your life easier and your serves perfect.

Don't be afraid of heights

Many British homes enjoy high ceilings and utilising this extra space should be a priority in all kitchen schemes. Consider doors that open upwards or specify our clever iMove units which allow you to bring the contents of high cupboards down to eye level.

Handleless trims

Our collection of 'true handleless' kitchens feature an ultra-modern, linear, handleless trim. This smart rail system sits neatly between the door and cabinet to create a void that enables you to reach in and easily open the cupboard.

This simple yet effective system not only functions seamlessly, but can also completely transform the overall look and feel of your kitchen when applied in any of our striking colours and finishes - creating an eye-catching design that is all about clean, uninterrupted lines.

We offer five unique handleless trim finishes for you to choose from. Lighting

Lighting is no longer just a kitchen accessory, it's a necessity. Creating a tailored lighting plan in the early stages of your kitchen design, will not only make your space feel lighter and brighter, but it can add that all important wow-factor. Don't worry, your Second Nature designer is there to help you to make those all important lighting choices - but here are some of the key design elements to consider.

What do I need and where?

in selecting the most appropriate lighting for the various tasks being carried out in your kitchen, a good place to start is considering these three key lighting environments – Task, Mood and Convenience.

Mood Lighting

Also referred to as feature, decorative or accent lighting, mood lighting is used to add dimension and depth to the room in order to create atmosphere and provide personality.

Convenience Lighting

Convenience lighting has a more specific purpose. It is directional and intended to be focused towards a specific area or to be used for a particular job in drawers or in cabinets.

Task Lighting

Task lighting provides effective light to undertake everyday activities such as food preparation. Perfectly positioned, task lighting makes the kitchen an efficient working space.
